## The Holy Family of Jesus, Mary and Joseph

December 26, 2021

### HOPE

One might think that the family of Jesus, Mary and Joseph is too remote, too special, too holy to be an effective model for our families. But just like our families, they enjoyed times of great joy but also suffered through terrible hardships. The delight of a new born baby was accompanied by the fear that led them to flee to a foreign land. Today let us pray that the faith and love shown by the Holy Family may sustain us through both our joys and our struggles.

Life Line Screening, the nation's leading provider of preventive health screenings, will offer affordable, non-invasive and painless health screenings at Our Lady of Rosary Church on Tuesday, February 22, 2022.

A package of five screenings to identify risk for stroke, heart disease and other chronic conditions will be offered:

**Carotid Artery Screening (Plaque)**

An ultrasound is performed to screen the carotid arteries (a pair of blood vessels in the neck that deliver blood to your brain) for buildup of fatty plaque. This buildup, called atherosclerosis, is one of the leading causes of stroke.

**Peripheral Arterial Disease Screening**

An Ankle-Brachial Index (ABI) test is performed using blood pressure cuffs on the arms and legs. It is important to screen for PAD because it increases the risk of coronary artery disease, heart attack, or stroke.<sup>1</sup>

**Abdominal Aortic Aneurysm (AAA)**

An ultrasound is performed to screen the abdominal aorta for the presence of an enlargement or aneurysm. AAA can lead to a ruptured aortic artery, which is a serious medical emergency.

**Atrial Fibrillation**

A 6-lead electrocardiogram (EKG) is performed by placing sensors on the arms and legs to screen for Atrial Fibrillation. AFib can lead to blood clots, stroke, and heart failure, and other heart-related complications.<sup>2</sup>

**Osteoporosis Risk**

An ultrasound is performed to measure the shin bone for abnormal bone mass density. This can help assess the risk of osteoporosis, a disease where bones become weak and brittle.
